Information for PhD students – Blockchain Summer School 2016

To get ECTS points, a written report needs to be submitted. The written report should be based on the results of the hackathon. It should feature both the underlying business logic of the blockchain proposal as well as the technical prototype itself.

In general, the report should be written in the style of an academic paper in the Information Systems Research field. The topic should be motivated by illlustrating its relevance for both academics and practitioners. The report should feature a review of the existing literature that discusses the topic. Subsequently, it should be explained how the prototype was devised following a Design Science Research methodology.

For more information on Design Science Research methodology, please see the reading list.

Please write approximately 5000 words.

Submission deadline is September 11th. Please send the report to Christoph Müller-Bloch (chmy@itu.dk) and cc Roman Beck (beck@itu.dk).
